

## ***The portable Drink Backpack***

With Mobile Drink Backpack you can invent soft drinks that don't even exist and that may never be on the market in this combination. It's quite possible that only once in the world will somebody try this very special mixture. This uniqueness makes your cooling moment very special. Your mix is just for you.

We always have, at least when we were little. Back then there were . Today there is and much more. And what will happen when we mix it? Now you can make up to 200 different drinks. Just put yourself together your own favourite taste. How does it work?

## Beverage vending machines for cold drinks

Drink Backpack for the sale of glass or PET (plastic) bottles and cans delivers chilled beverages around the clock - whenever employees, visitors and shoppers feel like a refreshment.

A great variety of possible combinations in terms of the number of product chutes, the total capacity and the distribution of the various beverages within the chute system result in a wide range of choices for the user.

High-efficiency cooling, energy management, electronic control and mobile data acquisition with modern Drink Backpack make modern cold drink vending machines easy-care star sellers with low follow-up costs.

With the possibility of placing an attractive poster on the front of the vending machine behind an advertisement and thus making you want to refresh yourself. The classic without a view of the drinks themselves. Variety should not play a major role here.

The portable vending machine, which always encourages customers to play creative games, also has tremendous advantages for the innkeeper. It can offer almost everything. And in all sorts of variations, including sugar-free ones - without renting extra storage space. All this is possible because the vending machine requires very little space - and only a water connection. The different flavours come from cartridges. So every drink is freshly mixed at the push of a button. A bit like the early ones.
